EMBRACE THE FUTURE OF DENTISTRY AT THE

# AB DENTAL EUROPEAN CONGRESS

SEP 19-22, 2024

Wyndham Grand Athens

## **The Euro Implantology Event of 2024**

AB Dental's 2024 European Implantology Congress is an unmissable opportunity for dental professionals from around the globe. Featuring seven internationally renowned speakers, this unique four-day event includes lectures on the latest methods and technologies in dental implantation and oral surgery – in one of the world's oldest and most fascinating cities.

### **Right Where It All Started.**

Greece is the cradle of Western civilization, and much of dentistry got its start there. The ancient Greeks invented pliers for tooth extraction and packed cavities with medicine-soaked linen, and even Hippocrates and Aristotle discussed oral hygiene in their writings. Today, things are slightly more advanced, of course, as our brilliant speakers will be sure to demonstrate in the course of our illuminating scientific program.
